

INSTRUCTION

KP-CM-06

1. General information

An IP camera is a device that allows you to remotely monitor a given area in the Keemple 2.0 application. It uses a Wi-Fi connection to transmit video and audio to your mobile device. The IP camera has real-time video recording functions and recording on a memory card. Additionally, the camera can function as a motion sensor, enabling automatic recording when events are detected and saving them on the memory card. It also has an infrared LED, thanks to which the image is visible even in complete darkness.

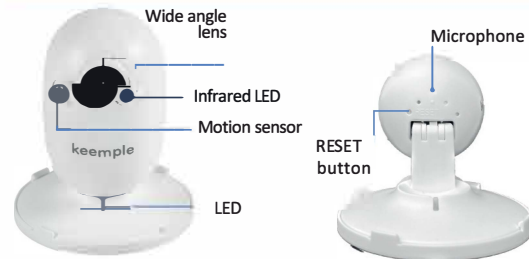

2. Package content

- KP-CM-06 IP camera.
- User manual.
- Power cable.
- Charger.
- Mounting accessories

3. Additional information

- 138° wide-angle lens
- 1080P resolution (optional switchable to 720P)
- Connectivity via Wi-Fi (2.4 GHz)
- Infrared LED
- Microphone
- Loudspeaker
- Motion sensor function
- Memory card slot (Micro SD)
- Retractable camera arm allows you to set it at any angle

4. Description of the device

5. Technical specifications

Power supply	Micro USB 5V 1000mA
Quality	1080p
Memory card type	Micro SD to 128 GB
Wireless protocol	Wi-Fi
Frequency	2.4 GHz
Reception	Range depends on Wi-Fi
Dimensions (mm)
